

Significant is delighted to have Andrew Maxwell join the team as Investment Committee Chair & Venture Partner. Andrew's leadership and commercialisation expertise are greatly appreciated additions to our mission to activate Australian innovation.

Significant is uniquely positioned as one of the only early-stage venture funds in the Australian market dedicated to uncovering applied technology innovations arising from the wealth of Australian intellectual property. Andrew shares this passion and has already proven invaluable as a "hands-on" investor in uncovering ground-breaking technologies.

Significant's mission is to address three key issues in the Australian market.

- The imperative for Australian universities to accelerate the translation of research innovation to market-focused innovations and growth companies;
- The chronic under-investment in applied science sector focused on industrial innovation and disruption;
- The need to match experienced professional investment managers and entrepreneurs with the creators of intellectual property to reduce risk and increase speed to market.

With the addition of Andrew's experience in providing strategic advice to business owners in emerging and high growth companies, we look forward to continuing to create value for the inventors, founders, and investors who back Australian innovation at the earliest stage.
